Accident prevention . . . 225
Acid open-hearth furnace in bomb production . . . 71
A.F.A. clay and fineness test . . . 727
Aging:
  aluminum castings at room temperature . . . 435
  time and temperature in treating a copper-bearing steel 215
  treatments, artificial, for aluminum castings . . . 433
Air filter type dust collector maintenance . . . 630
Air tests in castings inspection . . . 190
Aitchs metal . . . 49
Alloy:
  castings, gas elimination in non-ferrous . . . 116
  Flux constituents for aluminum, melting for permanent molding . . . 711
  gray cast iron, Effect of heat treatment on endurance limit of . . . 230
  Magnesium "M" . . . 651
  Magnesium-aluminum type, for die casting . . . 204
  Test bars for 85-5-5-5 . . . 1
Alloys:
  Fluidity testing of foundry . . . 37
  Fluxing light . . . 576
  Properties and applications of permanent mold casting . 706
Alloying elements in manganese bronze . . . 49, 55, 56
Aluminum alloy:
  die casting . . . 200
  Effect of iron on . . . 469, 473, 474, 476
  Effect of magnesium on . . . 468, 469
  Effect of manganese on . . . 469, 471, 472, 474, 476
  Effect of nickel on . . . 468, 470
  Effect of pouring temperature and overheating on . . 466
  Effect of zinc on . . . 469, 471
  Grain size of . . . 467
  Heat treatment of . . . 424, 466
  Hydrogen solubility in . . . 571
  Melting and casting procedure for . . . 465
  Melting of, for permanent molding . . . 711
Aluminum and magnesium permanent mold castings, Recommended practices for . . . 703
Aluminum bronze, Gas elimination in . . . 117, 127
Aluminum casting:
  alloy, 3 per cent Cu: 5 per cent Si . . . 324
  heat treating furnaces, Temperature control in . . . 426
Aluminum castings:
  Aging, at room temperature . . . 435
  Annealing treatment for . . . 426
  Artificial aging treatments for . . . 433
  Dimensional stability of . . . 740
  Furnaces for heat treatment of . . . 426
  Metallography of heat treated . . . 427-432
  Solution treatment for . . . 426
Aluminum die casting applications . . . 207
Aluminum in malleable iron . . . 102
Aluminum sand casting alloy, Effect of certain elements on mechanical properties of 1 per cent Cu, 5 per cent Si, and 0.5 per cent Mg . . . 465
Analysis:
  Bomb steel . . . 76
  Spectrographic . . . 554
Andreasen pipette method for sand fineness determination 404
Annealing:
  defined . . . 461
  treatment for aluminum castings . . . 426
Anodic treatment of permanent mold castings . . . 713
Antimony in malleable iron . . . 102
Apprenticeship, Conventional . . . 252
Apprentice training . . . 542
Arc welding:
  Carbon . . . 604
  Intermittent, of gray iron castings . . . 419
  Gray cast iron . . . 345, 355, 417
Arsenic in malleable iron . . . 102
Assembly:
  Bomb core cage . . . 73
  Bomb mold . . . 75
Atmospheric and Washburn risers . . . 283
Atmospheric pressure, Effect of, on solidifying metal . . 264

B

Balanced blast cupola . . . 814
Banding in centrifugal castings . . . 385
Batch core oven . . . 639
Bell-type heat treating furnace . . . 288
Bentonite:
  Effect of varying amounts of, in sand . . . 497, 634
Beryllium in malleable iron . . . 102
Bibliography on:
  Aluminum casting alloys . . . 329
  Bore cracks in steel castings . . . 689
  Chemical composition of malleable iron . . . 113
  Conditions of flow in bronze castings . . . 739
  Copper in steel castings . . . 224
  Ductility and elasticity of white and gray irons . . . 152
  Effect of mold materials on magnesium castings quality 662
  Engineering properties of heat treated cast irons . . 464
  Fluidity testing of foundry alloys . . . 46
  Gray cast iron inoculation . . . 843
  Gray cast iron wear resistance . . . 757
  Heat treatment of aluminum alloy castings . . . 424
  Homogenization heat treatments for cast steel . . . 183
  Insulating pads and riser sleeves for bronze castings . 282
  Low-temperature properties of cast steels . . . 374
  Manganese bronze . . . 69
  Microporosity in mangesium alloy castings . . . 261
  Microstructure related to properties of cast iron . . 302
  Molding sand binders . . . 854
  Molding sand fineness test . . . 411
  Preventing veining and penetration on castings made in synthetic sands . . . 139
  Residual stress relief of steel castings and weldments . 250
  Sealing bronze pressure castings . . . 701
  Section size of gray cast iron . . . 794
  Test bars for 85-5-5-5 alloy . . . 36
  Unsoundness in light cast alloys . . . 595
Binders:
  Cereal . . . 210, 633
  Molding sand . . . 845
  Simultaneous use of various . . . 852
  Types of . . . 691
  used in core making . . . 319
Bleeding of steel castings . . . 677
Blind risers:
  Effect of, on tensile properties in L.T.B. test bar . . 6
  Graphite rod in . . . 283
Blow holes in permanent mold castings . . . 715
Bomb castings, Production of, by use of core barrel . . 70
Bore crack:
  defined . . . 670
  Photomicrograph of . . . 685
Bore cracking:
  Effect of pouring temperature on . . . 686
  Elimination of . . . 681
  Shrinkage as a factor in . . . 684

	Page
Bore cracking:	
Stress factor in	681
Veins and their relation to	685
Bore cracks:	
Brackets for preventing, in steel valves and fittings	674
Effect of gas atmosphere on	688
Effect of metal composition on	687
in cast steel fittings and valve bodies	670
Boron in malleable iron	103
Bosses in die casting	205
Box-type heat treating furnace	288
Brackets for preventing bore cracks	674
Brass and bronze, Molding sand for	331
Brazing procedure for gray iron castings	417
Brinell hardness of gray cast iron	545
Bronze:	
castings, Cause of porosity and leakage of	696
castings, Conditions of flow in	732
Insulating pads and riser sleeves for, castings	262
Manganese	502
Mechanical properties	700
Mechanical tests on	698
melting practice	734
microstructure	698, 700
Molding sand for brass and	331
pressure castings, Sealing through heat treatment	696
test coupons,	392
Velocity measurements of molten	734
welding of gray iron castings	606
Bronzes:

scale calibration 410
Hydrostatic testing of valves and fittings 186

I

Immersion type thermocouple 556
Impact strength test 144, 188, 566
Impellor:
Multiblade type fan 627
Radial blade fan 627
Impingement type dust collector 667
Inclusions:
and dross in permanent mold castings 715
in cast steel 555-557
Non-metallic, in malleable iron 108
Influence of sand mixture on veining 135
Ingot copper, Fluidity test spirals for 264
Ingot principle in feeding solidifying casting 264
Ingots, fluted 738
Inoculants:
classified 815, 837
defined 548
Inoculation:
of gray iron 548, 756
Theories of gray cast iron 837
Inserts, metal, in permanent molding 703
Inspection—The backbone of quality control 422
Inspection:
Air tests in castings 190
Control 565
Fluorescent-penetrant 766
Gamma-ray 766
Layout 566
Non-destructive 186
of die castings, Process 207
Radiographic 566
Inspection department, Duties and function of 752
Insulating pads and riser sleeves for bronze castings . 262
Internal stresses in castings 593
Intermittent arc welding of gray iron castings 419
Iron:
Effect of, on aluminum alloys . . . 469, 473, 474, 476
oxide 634

J

J.I.T. Training 184
Johnson's apparent elastic limit 142

K

Keel block test bar 6
Knock-off risers for non-ferrous castings 795

L

Ladles:
Bottom-pour, Sampling from, in fluidity testing . . 45, 46
Drying of 458
Lanthanum in malleable iron 106
Layout inspection 566
Lead:
distribution in bronze 646
Effect of, on manganeze bronze 61, 503
in malleable iron 106
Leakage, Cause of, in bronze castings 696
Light alloys, Unsoundness in cast 568
Lighting-off of cupola 808
Light metals, Localized shrinkage in 577
Lining and patching of cupola refractories 749
Liquidus-solidus measurements for bronzes 645
Lithium in malleable iron 106

Page

Low-temperature:
notched-bar tests 161
properties of cast steels 357
properties of copper-bearing steels 220
L.T.B. test bar, Effect of blind risers on properties of 5, 6

M

Machine turnings in the charge, Effect of use of . . . 23
Machining tolerances for permanent molds 705
Magnesium alloy castings:
Microporosity in 254
Relative significance of design and metallurgical factors to serviceability of 93
Magnesium alloys, Melting:
for permanent molding 711
flux for, permanent molding 712
Magnesium-aluminum type alloy for die casting . . . 204
Magnesium:
castings quality, Effect of mold materials on 648
Effect of, on aluminum alloys 468, 469
in malleable iron 106
"M" alloy 651
part, Centrifugal casting of 383
permanent mold casting, Recommended practices for aluminum and 703
Magnetic particle testing . . 196, 566, 672, 678, 680, 686, 766
Maintenance of foundry dust control equipment . . . 626
Malleable:
castings, cores for automotive 210
coremaking practice 316
Malleable foundry:
coremaking practice 316
control 818
core sand practice 631
Malleable iron:
Aluminum in 102
Antimony in 102
Arsenic in 102
Beryllium in 102
Boron in 103
Cadmium in 103
Cerium in 103
Chemical composition of 101
Chromium in 103
Cobalt in 104
Columbium in 104
Copper in 104
Gallium in 105
Gold in 105
Hydrogen in 105
Lanthanum in 106
Lead in 106
Lithium in 106
Magnesium in 106
Manganese in 106
Molybdenum in 107
Nickel in 108
Nitrogen in 107
Non-metallic inclusions in 108
Oxygen in 108
Palladium in 108
Phosphorus in 108
Platinum in 109
Selenium in 109
Silicon in 109
Sulphur in 109
Tantalum in 110
Tellurium in 111
Thallium in 111
Thorium in 111
Tin in 111
Titanium in 111
Tungsten in 111
Uranium in 111
Vanadium in 111
Zirconium in 111

Page

Manganese and silicon on tensile properties of steel castings, Cumulative effect of copper, ... 215
Manganese bronze:
Alloying elements in 49, 55, 56
Applications of 68
Chemical composition of 49
Chill cast bar, Fracture appearance of 58
Combined chemical analysis and microstructure of . . 58
Control of alloys during melting of 58
Corrosion resistance of 63
Dezincification of 63
Effect of elements on physical properties of . . 57, 61, 503
Effect of pouring temperatures on 58
Effect of tin on 61, 503
Fluxes for 58
Torsion test for 58
Types of 60
Zinc equivalents for 51, 52
Manganese, Effect of, on aluminum alloys 469, 471, 472, 474, 476
Manganese in malleable iron 106
Mass effect:
on gas elimination in aluminum bronze 127
on gas elimination in hydraulic bronze 127
Maurer diagram for cast iron 855
Mean specific heat 541
Mechanical:
charging of cupola 812
properties of bronze 700
properties of 1% Cu, 5% Si, and 0.5% Mg aluminum sand casting alloy 465
property distribution in sand cast bronzes 641
shakeout, Dust control in 310
tests on bronze 698
shakeout, Foundations for 308
Mechanics of combustion in cupola 512
Mechanism of:
hardenability 826
veining 130
Melting:
and foundry practice for cast steels 357
and casting procedure for aluminum sand cast alloy . 463
Combustion factors in crucible furnace 616
control, Steel 553
for permanent molding, Fluxes for magnesium alloy . 712
of aluminum alloy for permanent molding, Flux constituents for 711
of manganese bronze, Control of alloys during . . . 58
practice for bronze 734
practice in permanent molding 710
techniques, Effect of various, upon melt quality . . . 16
Melt preparation, Method of 19
Melt contamination, Sources of gas 3
Melt quality:
Effect of charging method on 19, 21, 22, 23
Effect of furnace design on 20, 22
Effect of melting practice on 35
Effect of various melting techniques upon 16
Evaluation of 11
Test bars employed to measure 4
Metal composition, Effect of, on bore cracks 687
Metallography:
of cast steels 358, 560, 564
of heat treated aluminum castings 427-432
Metallurgical and design factors, Relative significance of, to serviceability of magnesium alloy castings . . 93, 96
Metallurgical aspects of cast iron repair welding . . . 343
Method:
Andreasen pipette, for fineness determination . . . 404
of melt preparation 19
Methods:
Coremaking 693
of gating, in fluidity testing 41, 45
Quality control 764
Microconstituents in gray iron 294

Page

Microexamination of bronze 698
Microhardness tests of:
Austenite, austenite-martensite 149
Carbide 148
Pearlite, acicular, ferritic. 149
Microhardness tester, Tukon 143
Microporosity, Effect of A.F.A. permeability and moisture content of molding sand 588
Microporosity:
Effect of A.F.A. permeability and moisture content of molding sand 588
Effect of grain size on, in light metals 587
Effect of mold material on 260
Effect of pouring temperature on 260
formation mechanism 254
in cast light alloys 573
in centrifugal castings 385
in light metals, Effect of composition on 580
in light metals, Effect of gas content on 585
in light metals, Graduation of shrinkage into . . . 578
in magnesium alloy castings 254
Relation of riser size and thickness to occurrence of, in castings 257
Relationships of alloy composition, gas content of melt, and section thickness to occurrence of 255
Microradiographs of sections of 85-5-5-5 alloy test bars 14, 15
Microstructure:
of manganese bronze 58, 700
of 85-5-5-5 alloy test bars 8, 11-15
related to properties of cast iron 294
Misch metal 103
Misruns in permanent mold castings 715
Mixing of core sands 211, 380, 635
Mixtures, Core 692
Models in designing and planning, Use of Wood . . . 483
Modulus of Elasticity (Tangent) 141
